

## The `authortitle-terse` style

This style implements a terse author-title citation scheme suitable for both in-text citations and citations given in footnotes. It differs from the regular `authortitle` style in that the title is only printed if the bibliography contains more than one work by the respective author or editor.

### Additional package options

#### The `dashed` option

By default, this style replaces recurrent authors/editors in the bibliography by a dash so that items by the same author or editor are visually grouped. This feature is controlled by the package option `dashed`. Setting `dashed=false` in the preamble will disable this feature. The default setting is `dashed=true`.
