

# Testing L<sup>A</sup>T<sub>E</sub>X class and BibT<sub>E</sub>X style for the Journal “Economica” (ECCA)

By ARNE HENNINGSEN and JIM NOBODY

November 18, 2009

This is an abstract. This is an abstract. This is an abstract. This is an abstract. This is an abstract.

This is an abstract. This is an abstract. This is an abstract. This is an abstract. This is an abstract.

This is an abstract. This is an abstract. This is an abstract. This is an abstract. This is an abstract.

Key words: Economica, BibTeX, LaTeX

JEL classification: A1, B2, C3

## INTRODUCTION

The first section header should not be numbered. Hence, use the starred \section command for the header of this section, i.e. \section\*{Introduction}. Type all (foot)notes at the end of the paper.<sup>1</sup> Place (long) tables and figures at the end of the paper (see figure 1 and table 1). You can use the class option ‘endfloat’ to move all float environments (figures and tables) to the end of the output file, i.e. use \documentclass[*endfloat*]{ecca}.

[Figure 1 here]

[Figure 2 here]

## I. MANUSCRIPT FORMATTING

The manuscript formatting instructions are available at <http://www.blackwellpublishing.com/ecca>.

## II. CITATIONS

### (a) *Citations in Text*

Brown in a paper on ...

Brown (2000, p. 12) has shown that ...

A proof is given by Jones *et al.* (1998).

An overview is available in table 1.

[Table 1 here]

(b) *Citations in Parenthesis*

This method has been criticised (Jones, 1999a,b; Brown and Smith, 2000).

### III. EQUATIONS

All displayed equations should be left-justified and — where necessary — numbered consecutively (on the left).

$$(1) \quad y = a + Xb$$

where  $a$  is a scalar,  $y$  and  $b$  are vectors, and  $X$  is a matrix.

Now, we have an unnumbered equation

$$\theta = \alpha + \Psi\beta$$

where  $\alpha$  is a scalar,  $\theta$  and  $\beta$  are vectors, and  $\Psi$  is a matrix.

### IV. QUOTATION MARKS

The ‘Economica’ requires single quotes. You can get pretty (typographically correct) quotation marks by adding the commands `\usepackage{csquotes}` and `\MakeInnerQuote{"}` in your preamble and use the “ sign for quation marks in your text.

### ACKNOWLEDGEMENTS

The BibTeX code to replace repeated author names by multiple dashes in the list of references has been kindly provided by Joseph A. Wright ([joseph.wright@morningstar2.co.uk](mailto:joseph.wright@morningstar2.co.uk)).

### NOTES

1. This is automatically done with the ‘endnote’ package. This is automatically done with the ‘endnote’ package.

## APPENDIX A: WEBSITES OF THE ‘ECONOMICA’

- <http://www.blackwellpublishing.com/ecca>
- <http://darp.lse.ac.uk/Frankweb/Economica/EconomicaHome.htm>

## APPENDIX B: PROOFS

$$14 = 2 \cdot 7 = 2(3 + 4) = 2 \cdot 3 + 2 \cdot 4 = 6 + 8 = 14$$
